

CANVAS

Ink Jet canvas for framed printings or for stretching on wooden frames

The demands on coated cotton or polyester fabric are very different, depending on its intended use: for real fine art prints the material should have a natural structure, be durable for long-term archivability and be as close as possible to a real artist's canvas with regard to visual appearance and the feel of the surface. A higher degree of whiteness is required for canvas prints and a consistent structure for lifestyle and display applications. What all applications have in common is the desire for a high level of colour intensity, universal printability, as well as good resistance to cracking and tearing so there are no problems with further processing.

FIELD OF APPLICATION

- Ink Jet canvas for framed printings
- Art prints
- Lifestyle posters
- Exhibition work
- Stage decoration

SALES ARGUMENTS

- Woven and coated in Europe
- High level of consistency
- Brilliant white surface
- Natural finish on the back
- Very good colour gamut and high brilliance of colours
- Well-balanced woven structure which emphasises the character of the canvas
- Flexible coating for good stretchability
- Does not easily tear crack

MANUFACTURED IN EUROPE

What that means for you:

- Good availability
- High service and quality advise
- Compliant in production with all environmental and health regulations (REACH etc.)
- QM-System ISO 9001:2008 certified

TECHNICAL DATA

Canvas for waterbased inks (pigment/dye) and latex inks

	SI 171 White, semi matt	SI 173 White, semi matt	Folajet Canvas P Natural, matt
Ink compatibility			
Material	100% cotton with natural structured surface	30/70% Polyester-cotton blend with natural structured surface	30/70% Polyester-cotton blend with brownback
Thickness	480 µm	450 µm	435 µm
Grammage	360 gsm	360 gsm	320 gsm
Warp/weave	2:1	1:1	1:1
Roll length	15 m	15 m	10 m
Roll width in mm	610, 914, 1067, 1118, 1270, 1520	610, 914, 1067, 1118, 1520	610, 914, 1067, 1270, 1524
Core diameter	76 mm	76 mm	76 mm

Canvas for solvent based and UV-curable and latex inks

	SI 453 White, semi matt	SI 471 White, satin
Ink compatibility		
Material	30/70% Polyester-cotton blend with natural structured surface	100% cotton with natural structured surface
