

**PRESS
RELEASE****FOLEX GROUP WILL DISCONTINUE THE BUSINESS ACTIVITIES OF
REGULUS COATING GMBH AS OF MARCH 2026**

Erlangen | Cologne, 23.7.25 – The Folex Group will discontinue the business activities of its subsidiary Regulus Coating GmbH as of March 2026. Production at the Erlangen site will be shut down as a result.

The decision is the result of a transformation process lasting several years. Despite targeted restructuring measures and organizational adjustments within the group, it was not possible to create economically sustainable prospects for the site.

Decisive factors included the continuing weakness of the industry and market, increasing price pressure from international competitors - particularly from the Far East - high energy costs with no reliable prospect of relief and structural changes in the advertising market.

In future, the Folex Group will focus increasingly on its locations in Cologne (Germany) and Schwyz (Switzerland) in order to further develop its core businesses in a targeted manner and sustainably increase efficiency and profitability.

The production and supply of Regulus Coating GmbH products to customers is planned to continue until February 2026. Employees, customers and business partners have already been informed of the planned course of action.
