FOLACOAT[®] SPEED

High-performance coating plate for
maximum speed and consistent coating quality

Power coating plate

for maximum speed and stable processes

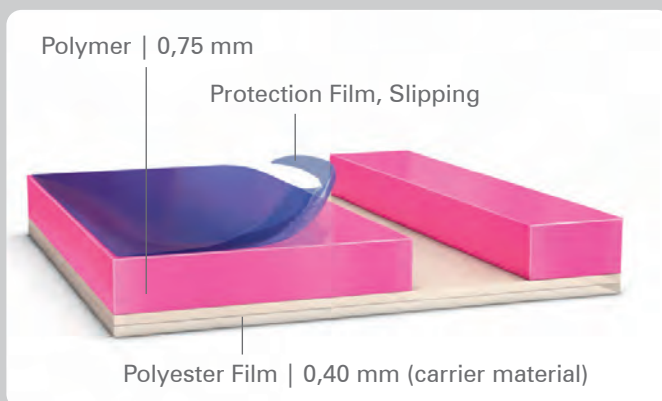

Increasing machine speeds, growing production pressure, and the demand for stable, reproducible processes are creating new requirements for coating plates in sheetfed offset printing. Folacoat® Speed has been developed precisely for these conditions: reliable

performance in the high-speed segment. The targeted optimization of the polymer ensures smooth running, excellent coating transfer, and maximum process reliability without roller bouncing or ink build-up – even at the highest production speeds.

Maximum process stability

Folacoat® Speed – key benefits

- Successfully tested at 21,000 sheets per hour
- No roller bouncing thanks to reduced polymer hardness
- Smooth, uniform running even at maximum speed
- No ink build-up during the process

Best results

with the Folex system solution

As a proven Folex system solution, the latest Folacoat® Speed coating plate achieves its full performance potential in combination with the compressible underpacking film Folacomp® and guarantees maximum coating quality.

The perfectly matched components ensure stable, reproducible results, reduce downtime, and sustainably increase the efficiency of your production.

Efficient further processing

- Good stripping properties for safe handling
- Double carrier for easy handling and stability
- Optimized plotting process with latest blue cut visualization film providing surface protection for improved contrast, reliable detection of cut knock out areas, and enhanced process reliability

Your measurable production advantage

With Folacoat® Speed, you increase:

- Productivity through stable processes even at the highest machine speeds
- Process reliability through smooth running without roller bouncing or ink build-up
- Efficiency through reduced cleaning and downtime

Test now and increase productivity.

**Benefit from the outstanding performance of the Folacoat[®]
Speed coating plate in the high-speed segment – for greater
productivity and process reliability.**

Rely on Folex – the No. 1 for highest coating quality!

Product liability clause
